Finding aid · 165 records · 1816–1846 · Archives of California: A Documentary Calendar of the Savage Transcripts

Provenance. Thomas Savage's 1876–77 copies (for H.H. Bancroft) of the Spanish- and Mexican-era government records of Alta California, made at the U.S. Surveyor-General's office; the originals burned in the 1906 San Francisco fire, leaving these transcripts the sole record. Manuscripts: Bancroft Library, University of California, Berkeley (BANC MSS C-A 41); digitized microfilm on the Internet Archive (168036069_81_3). This calendar is an independent, AI-assisted index with published error rates — verify any record against the manuscript scan before citing (searchable, with scan links: archivesofcalifornia.com). **Coverage:** VERIFIED terminal 2026-07-28 (gap-read audit) — best-evidenced bound in the archive: copyist Savage's SIGNED volume-end nota (n139, Sep 1877) certifies the remainder routine (multas, ballenero names, small contraband), AND a 2nd sampling pass (07-25, ~26% density) proved the sweep recovers hidden items (caught the Stephen Smith steam-engine→Rancho Bodega find, n95). Item-read no–n83 + bounded tail n84–n139 by copyist certification.  PUBLISHED to the Bases DB 2026-07-28 (commit a381209b, 102 records live; d6/d6b = two documents on one leaf sharing doc_id 6, accepted pattern). See [[gap-read-verification-2026-07-27]].
